BAND INFO

Watch me Rise brings a mix of **Emo, Post Hardcore, and classic Punk Rock**, which will be familiar to fans of **Touché Amoré, De-feater, or La Dispute**. The energetic yet often deeply emotional songs of the five Frankfurt musicians inspire both movement and reflection, underscoring the emotionally charged lyrics that speak of pain, sorrow, anger, and healing. Since their formation in 2018, they have shared the stage with big names like **Black Flag, Being as an Ocean, and Enter Shikari**. During their approximately **40 shows in 2023**, the Frankfurt band impressed a wide audience. Starting in 2025, the band plans to continue their successful journey with a new album in tow.

CURRENT SITUATION

With Oh Lumiere Publishing as a strong partner supporting us, we have a solid foundation. Additionally, we have graphic designers and photographers within the band, which greatly simplifies the creation of professional media and content. Thanks to a vast network of contacts in festivals, clubs, and agencies, we've successfully managed all our booking independently in the past. Moreover, we have a large professional network for studio work and live crew, as well as our own van, which allows us to play spontaneous shows.

OUR GOAL

We are looking for a label that understands our market and can strategically support us in the coming years, as well as co-release our new album. Oh Lumiere will continue to serve as our publisher and marketing advisor. We've already secured **additional funding from the Initiative Musik** for the new album. The label should assist us in the **production and release of the LP** in both physical and digital formats, as well as with the associated product management. Additionally, we are seeking a partner to help us establish collaborations, such as influencer partnerships and mail orders.

NEW ALBUM

11 songs are already mixed and currently in the mastering process.

The album was produced by Konstantin Cajkin (Kind Kaputt). You can listen to a preview of the album here:

“Watch Me Rise proves that they are one of the post-hardcore bands to be looking at in the future”

INTO THE VOID
